

el-tunnel[®]

DESCRIPTION

EL-TUNNEL[®] signaling is an evacuation system made up of electroluminescent bands, Big Power, Derivation Control Unit and a transformer, which guarantees the safe and correct dynamic signaling of evacuation routes.

TECHNICAL CHARACTERISTICS

- ⇒ Output current: 3 A
- ⇒ Working current: 2A
- ⇒ Power: 110-230VAC // 50-60 Hz
- ⇒ Self extinguishing and flexible
- ⇒ Protection degree: IP65
- ⇒ Current distributor: IP68
- ⇒ Monochromatic uniform lighting
- ⇒ Band length: 25m

INSTALLATION AND ACCESSORIES

The bands come with the necessary holes for their correct and safe installation, and are fixed by two PVC strips to keep them watertight.
